LOCAL EXCHANGE SERVICESTARIFF FORMAT

Page Numbering - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. From time to time new pages may be added to the Tariff. When a new page is added between existing pages a decimal is added to the preceding page number. For example, a new page added between Pages 3 and 4 would be numbered 3.1.

Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect.

Paragraph Numbering Sequence - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level. The following is an example of the numbering sequence used in this Tariff.

2.
2.1
2.1.1
2.1.1.A.
2.1.1.A.1.

Check Sheets - When a tariff filing is made with the Commission, an undated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the Tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is updated to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the Check Sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

LOCAL EXCHANGE SERVICES**SECTION 2 - RULES AND REGULATIONS (Continued)****2.9 RESPONSIBILITY OF CUSTOMER (Continued)****2.9.3 Cancellation by Customer****A. Orders Requiring Special Facilities**

Orders for service may not be canceled absent agreement of Company. If Customer orders service requiring special facilities dedicated to the Customer's use and Company permits Customer to cancel the order before service begins or Customer cancels the order before completion of the minimum service period or before completion of some other period mutually agreed upon by Customer and Company, a charge will be made to Customer for the nonrecoverable portions of expenditures or liabilities incurred expressly on behalf of Customer by Company and not fully reimbursed by installation and monthly charges. Such charge will be determined on a case-by-case basis, or as stipulated in a service agreement.

B. Customers With Term Service Agreements

Customer may cancel service any time after meeting the minimum service period. Termination charges will apply if Customer cancels prior to the expiration of a one-year or multi-year service agreement. 2.9.7 Deposits

The Company may require a deposit from Customers to protect against uncollectible accounts. The maximum amount of any deposit shall not exceed the equivalent of the customers estimated liability for two months usage. Payment of a deposit by the Customer does not relieve the Customer of the responsibility to make timely payments on the account with the Company.

The Company will pay interest on deposits held longer than 90 days, to accrue from the date the deposit is made until it has been refunded, or until a reasonable effort has been made to effect refund. The Commission shall notify the Company in January of each year of the interest rate prevailing for that year.

At the option of the Customer making a security deposit, the Company shall annually make either direct payment to the Customer of all accrued interest, or shall credit same to the Customer's account. Customer deposits may be refunded by a utility at any time. Residential Customer's deposits should not be held longer than one year and all other deposits should not be held longer than two years provided the Customer has established satisfactory credit during the period.

When the Company requires a deposit from any residential Customer, said Customer shall be permitted to pay it in three consecutive monthly installments whenever the total amount of the required deposit exceeds the sum of forty dollars (\$40.00). Provided, however, that the Company shall have the discretion to allow the payment of any deposit (more or less than \$40.00) over a longer period of time to avoid undue hardship.

2.9.8 Bad Check Charge

Company will bill Customer a charge of \$20.00 if Customer's check for payment of service is returned for insufficient or uncollected funds, closed accounts, or any other insufficiency or discrepancy necessitating return of the check at the discretion of the drawee bank or other financial institution.

1. After ten days' written notice, for non-payment of tariffed local exchange services, including basic telephone services, or any tariffed basic bundled service due to Company for more than 30 days beyond the date of rendition of the bill for such service. Notice of disconnection shall be separate and apart from the regular monthly bill for service;
 2. After ten days' written notice, in the event of a violation of any regulation governing the service under this Tariff;
 3. After ten days' written notice, upon condemnation of all or any material portion of the facilities used by Company to provide service to a Customer or in the event a casualty renders all or any material portion of such facilities inoperable beyond feasible repair.

2.10 RESPONSIBILITY OF COMPANY (Continued)

2.10.2 Fractional Charges

Charges for a fractional part of a month are calculated by counting the number of days remaining in the billing period after service is furnished. Divide that number of days by 30 days (billing period). The result is then multiplied by the applicable monthly service charge to arrive at the appropriate fractional monthly service charge.

2.11 RESTORATION OF SERVICE

The use and restoration of service in emergencies shall be in accordance with the priority system specified in Part 64, Subpart D of the Rules and Regulations of the Federal Communications Commission.

LOCAL EXCHANGE SERVICESSECTION 2 – RULES AND REGULATIONS (cont'd)**2.12 TIMING OF CALLS**

2.12.1 For the purpose of determining charges the following applies.

- A. The rate for each message will be on a per-minute basis, with fractional minutes computed.
- B. Chargeable time for all calls begins when connection is established between the calling line and the called line, branch exchange or Centrex System and ends when the calling line "hangs-up" thereby releasing the network connection. If the called line "hangs-up" but the calling line does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telecommunications network or by the Telephone Company operator.

The Day, Evening, Night and Weekend rates apply to that portion of the message occurring within the rate periods stated below. The charges are determined separately for each rate period and the results are totaled.

Day, Evening, Night and Weekend rates apply as follows.

<u>Time Applicable</u>			
<u>Rate Periods</u>	<u>From</u>	<u>To, But Not Including</u>	<u>Days Applicable</u>
Day*	8:00 A.M.	5:00 P.M.	Monday through Friday
Evening*	5:00 P.M.	11:00 P.M.	Sunday through Friday
Night	11:00 P.M.	8:00 A.M.	Every Day
Weekend	8:00 A.M.	11:00 P.M.	Saturday
Weekend	8:00 A.M.	5:00 P.M.	Sunday

Discounts for the Evening, Night and Weekend reduced rate periods stated in the Rate Schedule are expressed as a percent reduction of the charge calculated at the Day Rates of initial minute and additional minutes. They are applied to the portion of the message occurring within the rate discount periods stated in the table.

For all classes of service the discount is applied only to the sum of the initial minute and additional minute charges. The discount is computed separately for charges in each rate period and the results are then totaled.

* Rates Applicable on Certain Holidays

On New Year's Day (January 1), Memorial Day (the last Monday in May), Independence Day (July 4), Labor Day (the first Monday in September), Thanksgiving Day (the fourth Thursday in November), and Christmas Day (December 25), the holiday rate applicable is the Evening Rate, unless a lower rate would normally apply.

2.14 CUSTOMER OVERPAYMENTS DUE TO ERRONEOUS BILLING

2.14.1 Interest shall be paid at the unadjusted Customer deposit interest rate set forth in Section 2.9.7.

Company will notify the Customer promptly if there is any need for further corrective action. Within ten (10) days of receiving this notice, the Customer must take this corrective action and notify Company of the action taken. If the Customer fails to do this, Company may take whatever additional action it deems necessary, including the suspension of service to protect its facilities, equipment and personnel from harm.

2.17 ASSIGNMENT

Company may, without obtaining any further consent from Customer, assign any rights, privileges or obligations under this Tariff. Customer shall not, without prior written consent of Company, assign, transfer, or in any other manner dispose of any of its rights, privileges or obligations under this Tariff. Evening*	5:00 P.M.	11:00 P.M.	Sunday through Friday
Night	11:00 P.M.	8:00 A.M.	Every Day
Weekend	8:00 A.M.	11:00 P.M.	Saturday
Weekend	8:00 A.M.	5:00 P.M.	Sunday

Discounts for the Evening, Night and Weekend reduced rate periods stated in the Rate Schedule are expressed as a percent reduction of the charge calculated at the Day Rates of initial minute and additional minutes. They are applied to the portion of the message occurring within the rate discount periods stated in the table.

For all classes of service the discount is applied only to the sum of the initial minute and additional minute charges. The discount is computed separately for charges in each rate period and the results are then totaled.

* Rates Applicable on Certain Holidays

On New Year's Day (January 1), Independence Day (July 4), Labor Day (the first Monday in September), Thanksgiving Day (the fourth Thursday in November), and Christmas Day (December 25), the holiday rate applicable is the Evening Rate, unless a lower rate would normally apply.

LOCAL EXCHANGE SERVICESSECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)3.2 MEASURED RATE SERVICES (Continued)

3.2.5 Calculation of Distance

Where applicable, usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

3.2.5.1 Where applicable, the airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The customer can obtain V&H coordinates from the company or from the national publications of Telcordia and NECA.

The airline distance between any two (2) rate centers is determined as follows:

3.2.5.2 Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced document.

3.2.5.3 Obtain the difference between the "V" Coordinates and the "H" coordinates of the two rate centers.

3.2.5.4 Divide the differences obtained in 3.2.5.3 by three (3), and round each quotient to the nearest integer.

3.2.5.5 Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in 3.2.5.4 by three (3) and repeat the step in 3.2.5.5. Repeat this process until the sums are less than 1778.

3.2.5.6 The number of successive divisions by three in steps 3.2.5.4 and 3.2.5.5 determines the value of "N". Multiply the final sum of the two squares obtained in 3.2.5.5 by the multiplier specified in the following table for this value of "N" preceding.

<u>N</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361

SECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)

- 3.2.5.7 Obtain square root of product in 3.2.5.6 and, with any resulting fraction, round up to the next higher integer. This is the message rate mileage except that when the mileage is so obtained is less than the minimum rate shown in 3.2.5.6 preceding, the minimum rate mileage corresponding to the "N" value is applicable.

LOCAL EXCHANGE SERVICESSECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)**3.9 CUSTOM CALLING FEATURES****3.9.1 General**

Custom Calling Services consist of optional service features for use in connection with a Customer's Local Exchange Service.

3.9.2 Regulations – Explanation of Terms

Anonymous Call Rejection – is an arrangement that allows a called party to reject calls from parties that have activated the *67 per call blocking feature to prevent the display of the calling telephone numbers to Caller ID subscribers or to prevent the display of the calling telephone numbers and associated main listed names to Caller ID with Name subscribers.

Call Block – is an arrangement which prevents future calls from up to six prespecified telephone numbers, one of which may be the most recent incoming call from an unknown telephone number immediately after the unwanted call has been received. Callers from the prespecified telephone numbers will receive an announcement that the called party is not accepting calls. For calls from a line within a multiline hunting group, the call will be blocked only when the main telephone number is included as one of the six prespecified telephone numbers.

Call Forwarding – is an arrangement whereby incoming calls may be transferred to another telephone number by dialing a prefix code and the telephone number of the service to which calls are to be transferred. Calls forwarded by this feature are subject to local and long distance message charges. This service contemplates that normal transmission performance quality cannot be guaranteed to all calls.

Call Intercept - Call Intercept is an optional enhancement to Caller ID that provides subscribers with options for responding to unidentified calls. Call Intercept routes unidentified incoming calls to an announcement that prompts the caller to record his or her name and business association or to discontinue the call. Call Intercept will then place a call to the Caller ID subscriber and, after replaying the caller's recording, offer to connect the caller, route the call to the subscriber's voice mailbox, or decline the call. If the call is declined, Call Intercept will notify the caller. Unidentified callers reaching Call Intercept will pay their normal rates for a completed call.

Call Trace – is an arrangement which permits the Customer to trace the last call received. The result of the call trace is automatically sent to the Company for subsequent furnishing to legally constituted law enforcement agencies or authorities upon proper request by them. The call trace result is not available to the Customer. The Company is not liable for damages if, for any reason, the call trace attempt is not successful.

Call Waiting – is an arrangement whereby a Customer who is using an exchange line arranged for call waiting is alerted, by means of a tone signal, when another caller is trying to reach that line. The Customer, by flashing the switchhook, is able to have alternate conversation between parties. Where facilities permit, the incoming call tone signal may be blocked on a per call basis. At the completion of the call, the call waiting feature is automatically reactivated.

LOCAL EXCHANGE SERVICES**SECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)****3.9 CUSTOM CALLING FEATURES (Continued)****3.9.2 Regulations – Explanation of Terms (Continued)**

Call Waiting ID Deluxe - Call Waiting ID Deluxe is an enhancement of the Call Waiting feature offered to residence and business customers that allows the "called" party to control the treatment of a second incoming call. Call Waiting ID Deluxe allows a customer who is on a call to receive the name and telephone number of a second caller and then determine how they want to manage that call by selecting one of the following options: put the first call on hold and answer the second call; connect the second caller to a hold announcement; drop the existing call and connect to the second caller; connect the second caller to a busy announcement; conference the existing call with the second caller; or send the second caller directly to Answer Call or another answering service. The name and telephone number of the second caller and options available for handling the second call will be displayed on a customer-provided Analog Display Services Interface (ADSI) screen telephone.

Caller ID - Caller ID is an arrangement which permits a customer with Local Exchange Service, other than foreign exchange, foreign zone or foreign central office services provisioned over interoffice facilities, to receive the calling telephone number and the main listed name associated with the calling telephone number for calls placed to the customer. The calling telephone number and name will be forwarded from the terminating central office to compatible customer-provided display equipment associated with a customer's Local Exchange Service. For calls originating from a line within a multiline hunting group, only the main telephone number and name will be delivered. If the calling telephone number and name is not available for forwarding to the called party, a message indicating that unavailability will be forwarded. The calling party can prevent the Caller ID customer from seeing the calling telephone number and name display by activating Per Call Blocking. There is no charge for using Per Call Blocking. When the calling party uses this blocking capability, the Caller ID customer will receive an indication on the Caller ID equipment that the display of the calling telephone number and name has been suppressed. Caller ID customers may redirect to an announcement, incoming calls with Per Call Blocking activated, by activating the Anonymous Call Rejection arrangement. Where facilities permit and when requested by a subscriber to Call Waiting, the calling name and number will display when Call Waiting is activated and this requires the next version of Caller ID CPE.

3.9.2 Regulations – Explanation of Terms (Continued)

Caller ID – Number Only - Caller ID – Number Only is an arrangement which permits a customer with Local Exchange Service, other than foreign exchange, foreign zone or foreign central office services provisioned over interoffice facilities, to receive the calling telephone number for calls placed to the customer. The calling telephone number will be forwarded from the terminating central office to compatible customer-provided display equipment associated with a customer's Local Exchange Service. The calling telephone number will be delivered during the first silent interval of ringing. For calls originating from a line within a multiline hunting group, only the main telephone number will be delivered. If the calling telephone number is not available for forwarding to the called party, a message indicating that unavailability will be forwarded. The calling party can prevent the Caller ID – Number Only customer from seeing the calling telephone number display by dialing a special code prior to placing each call. This is known as Per Call Blocking. When the calling party uses this blocking capability, the Caller ID – Number Only customer will receive an indication on the Caller ID – Number Only equipment that the display of the calling telephone number has been suppressed. There is no charge for using Per Call Blocking. Caller ID – Number Only customers may re-direct to an announcement, incoming calls with Per Call Blocking activated, by activating the Anonymous Call Rejection arrangement.

LOCAL EXCHANGE SERVICES**SECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)****3.9 CUSTOM CALLING FEATURES (Continued)****3.9.2 Regulations – Explanation of Terms (Continued)**

Fixed Call Forwarding – is an arrangement whereby incoming calls are transferred to another telephone number. These arrangements are established with the Company on a fixed basis and may only be rearranged by notifying the Company of the new telephone number to which the calls are to be transferred. Fixed Call Forwarding may be associated with individual lines, and Private Branch Exchange (PBX) trunks excluding those with Direct Inward Dialing (DID) Service. Fixed Call Forwarding arrangements are only available to Customers served by compatible electronic type switching equipment. Calls forwarded by these arrangements are subject to local and long distance message charges. These arrangements contemplate that normal transmission performance quality cannot be guaranteed to all calls forwarded.

Call Forwarding – Busy Line – is a fixed arrangement which automatically routes incoming calls to the designated telephone number when the called line is busy.

Call Forwarding – Don't Answer – is a fixed arrangement which automatically routes incoming calls to the designated telephone number when the called line doesn't answer before passage of a predetermined interval.

Dependent Number - A Dependent Number is an additional telephone number, serving off a Distinctive Ring master number, which allows for incoming calls only. The origination of calls from this number is not permitted. The dependent number will be the same class of service as the associated master number.

Distinctive Ring – is a feature which allows a Customer to have up to three separate telephone numbers assigned to one local exchange line. Each telephone number will provide a distinctive ring on incoming calls to allow for identification of the incoming call. A distinctive call waiting tone for each telephone number will be provided, where facilities permit, to Customers also subscribing to call waiting.

Master Number - A Master Number is the Local Exchange Service telephone number equipped with Distinctive Ring.

Per Call Blocking - Per Call Blocking is an arrangement which blocks the name and number of the calling party from being transmitted to Caller ID – Number Only or Caller ID display units for the next call placed. To activate Per Call Blocking, the customer presses *67 before placing a call. The message that will be displayed on the unit of the person being called will be "Private" or "P", depending upon the equipment being used. There is no charge for using Per Call Blocking.

3.9 CUSTOM CALLING FEATURES (Continued)

3.9.2 Regulations – Explanation of Terms (Continued)

Priority Call – is an arrangement which provides for one distinctive audible signal to the Customer when a call is received from one of up to six prespecified telephone numbers. If the Customer also subscribes to Call Waiting, and the incoming call arrives while the line is busy, the usual call waiting tone is altered with a distinctive pattern. For calls originating from a line within a multiline hunting group, the distinctive signal is only produced when the caller's main telephone number is one of those prespecified.

3.9.2 Regulations – Explanation of Terms (Continued)

Busy Redial – is an arrangement which permits the Customer to redial automatically the last number dialed. If the called line is found to be busy, a 30-minute queuing process begins. The Customer is then given an indication that the network will attempt to set up the call when the called line is idle. The network periodically tests the busy/idle status of the called line until both lines are found idle or the queuing process expires.

Remote Call Forwarding – is a telecommunications network service that utilizes a telephone number and electronic switching system central office facilities to automatically forward all incoming calls dialed to the Remote Call Forwarding telephone number to the connecting telephone number. For each call forwarded to a connecting telephone number charges apply as specified in this Tariff for Additional Message Units.

Return Call (*69) – is an arrangement which provides the Customer with an announcement of the last phone number that called them. To activate *69 the Customer presses *69. The Customer then hears an announcement which tells them the telephone number of the last party that called them. If the Customer wishes to return the call right away, voice prompts will instruct them to dial 1 and the call will automatically be returned. If the called line found to be busy, a 30 –minute queuing process begins. *69 is considered complete and billable when the telephone number is heard regardless of whether the call is actually returned. *69 will not work if the last caller has activated the Per Call Blocking feature (*67).

Select Forward – is an arrangement which permits a Customer to prespecify, up to a maximum of six, telephone numbers from which calls are to be forwarded. During the period that select forward is activated, only calls from one of the prespecified numbers will be forwarded. For calls from a line within a multiline hunting group, the call will be forwarded only when the main telephone number has been prespecified.

Special Forwarding – combines Call Forwarding with remote access capability. In addition to the current Call Forwarding feature-access method, the Ultra Forward feature provides Customers access from any tone-type address signaling capable telephone. The Customer dials a remote access directory number and then is guided by voice messages to enter their home or office telephone number equipped with the Ultra Forward feature, a Personal Identification Number (PIN) and a feature code.

LOCAL EXCHANGE SERVICES**SECTION 3 - LOCAL EXCHANGE TELEPHONE SERVICE (Continued)****3.10 DIRECTORY LISTINGS****3.10.1 Regulations**

The Company does not publish a directory of subscriber listings. The Company, however, does arrange for the Customer's main billing number to be placed in the directory or directories of the incumbent local exchange carrier. The primary listing is provided at no additional charge.

The rates and regulations specified herein for directory listings apply only to the alphabetical section of the directory. Listings are intended solely for the purpose of identifying subscriber's telephone number and as an aid to the use of telephone service.

The listings of subscribers, either without charge or at the rate specified within this Tariff for other listings are arranged alphabetically and are not intended for special prominence of arrangement. In accepting listings as requested by subscribers or prospective subscribers, the Company will not be a party to controversies between subscribers as result of the publication of such listings in the directories.

Listings must conform to the Company's specifications with respect to the directories. The Company reserves the right to reject listings when in, its sole judgment, such listings would violate the integrity of Company records and the directories, confuse individuals using the directory, or when the Customer cannot provide satisfactory evidence that he is authorized to do business as requested.

The Company reserves the right to limit the length of any listing to one line in the directory by use of abbreviations when, in its sole judgment, the clearness of the listing and the identification of the subscriber is not impaired.

Generally, the listed address is the location of the subscriber's place of business or residence.

Liability of the Company due to directory errors and omissions is as specified in Section 2 of this tariff.

Generally, a business listing consists of a name or dual name, a designation descriptive of the subscriber's business if not self-explanatory, the address, and the business telephone number. The main listing is ordinarily the name of the individual, firm or corporation which contracts for the service or the name under which a business is regularly conducted.

Non-published service means is an optional service provides for suppression of printed and recorded directory listings. A Customer's name and number do not appear in printed directories or Directory Assistance Bureau records.

Non-listed service means that the Customer's telephone number is not listed in the directory, but it does appear in the Company's Directory Assistance Records.

3.15.1 A Maintenance Visit Charge ("MVC"), a/k/a Trouble Location Charge, describes that process where the Company determines whether the trouble reported by the Customer is due to the Company or to the Customer.
