

Virtual Fax

Virtual Fax service delivers enterprise-grade faxing in the cloud, enabling you to adapt your aging fax infrastructure to today's work environment.

Like many other IT services, faxing made the jump to the cloud long ago, giving businesses the power to send fax to email, specify routing methods, and overcome compliance issues. The problem is that most of those “fax as a service” solutions are quite basic, built to address the needs of individual users or small home offices.

TPx's Virtual Fax service delivers enterprise-grade faxing in the cloud, including both inbound and outbound faxing. Virtual Fax will enable you to adapt your faxing to today's work environment, where secure document transfers and remote working are the norm rather than the exception.

Benefits

- **Mobility** Send and receive faxes from anywhere, over any Internet connection
- **Security** Your faxes are securely stored online, so only the intended recipients can view them
- **Simplicity** Sending a fax is as easy as sending an email
- **Lower costs** Reduce use of paper and toner; eliminate the need for extra analog phone lines or leased fax machines
- **Easy to manage** Our online admin portal enables you to manage faxing options on-the-fly
- **Business continuity** Protect your faxing capabilities in the event of a disaster or outage

With the Virtual Fax admin portal you can monitor all inbound and outbound faxes, manage shared phone books, and configure advanced settings.

Inbound fax features

- Receive inbound faxes to email or web client
- View and search inbound fax history
- Search PDFs of received faxes via OCR (optical character recognition)

Outbound fax features

- Fax multiple file attachments through email or web portal; supports all major file types
- Faxing to multiple recipients
- Scheduled faxing and auto retry attempts
- Fax notifications (successful and failed)
- View and search outbound fax history
- View outgoing fax queue

Administrative features

- Use toll-free numbers or local numbers
- Powerful reporting and tracking; audit trail of all fax activity
- View and manage outgoing fax queue for all users
- Create and manage phone books to store commonly-used numbers
- Designate other users to manage your faxes for you
