The case for remote work

Employers can save over $11,000 per half-time telecommuter per year.\(^1\)

Companies that allow remote work experience 25% less employee turnover.\(^2\)

Unproductive time for remote workers averages 27 minutes vs. 37 for in-office workers.\(^3\)

Remote workers work an average of 1.4 more days every month (16.8 days/yr).\(^3\)

Full-time remote workers claim job happiness 22% more than people who never work remotely.\(^2\)

73% of all teams will have remote workers by 2028.\(^4\)

Basic tools to deploy

Unified Communications and Collaboration tools
- Video calling
- IM & presence
- Virtual, always-on meeting room space
- Email/productivity platform accessible from anywhere, like Office 365

Security and Business Continuity
- Comprehensive firewall management
- Endpoint management and security tool
- Failover when the cable hiccups
- Reliable support 24/7

TPx is well positioned

Remote enabling is what we do
We are a mobile workforce using many of these same tools
We have experience dealing with wildfires and hurricanes
We solve business problems in emergency situations
The case for remote work

- Employers can save over $11,000 per half-time telecommuter per year.1
- Remote workers work an average of 1.4 more days every month (16.8 days/yr).3
- Companies that allow remote work experience 25% less employee turnover.2
- Full-time remote workers claim job happiness 22% more than people who never work remotely.2
- Unproductive time for remote workers averages 27 minutes vs. 37 for in-office workers.3
- 73% of all teams will have remote workers by 2028.4
