

The TCO of Unified Communications

Total Cost of Ownership (TCO) is the sum of all the costs – both direct and indirect – of a solution over the course of its expected life cycle.

Premises-based UC

Hosted UC

Average cost per month per user

\$48

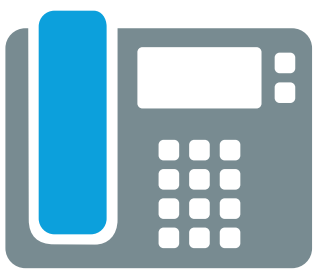

\$32

UC features

Often require a separate specialized server for each component

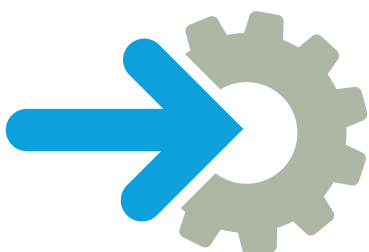

Built into the service or available as add-ons

PSTN connectivity

Must be contracted through another vendor

Typically included in the service as bundled usage minutes

Software upgrades

Require additional expense and possibly new server hardware

Built into the service

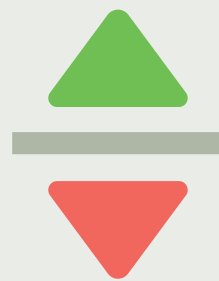

Beyond TCO: 4 more reasons to choose hosted UC

Built-in business continuity

Easily managed in a web portal

Quickly scales up or down

Highly customizable
