

# Why move your business communications to the cloud?

Choosing the right communications platform for your business can help you to enable mobility, worry less about disasters, and even save you money.

## “The Office” redefined

24%

home

14%

road warriors

62%

traditional office

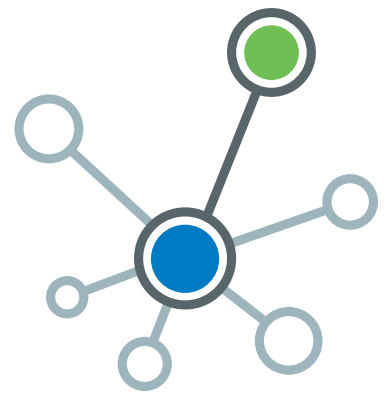

38% of employees no longer work in a traditional office. They either work from home — some or all of the time — or are road warriors who spend most of their time traveling. A cloud-based Unified Communications service makes it easy to work remotely.

Mobile apps with HD video calling and chat sessions

Built-in instant desktop sharing and collaboration tools

Find me, follow me call forwarding with business identity

## Business continuity

53% of businesses take more than one day to recover from a serious DR event. How can you keep your business running as it recuperates?

As a cloud service, local events have no impact.

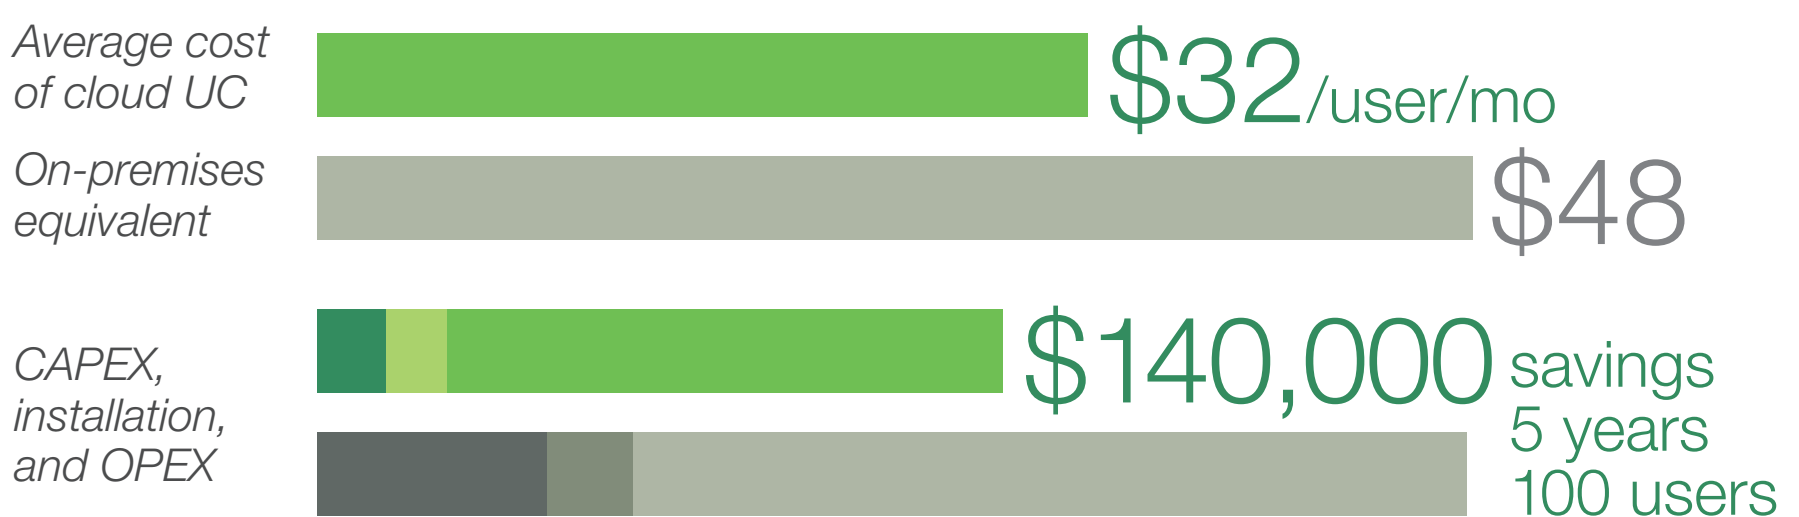

Manage features from any Internet connection

Easily forward calls to alternate locations

## Lower total cost of ownership
