UCx SmartVoice SIP Trunks

Trusted by 1,200 financial companies, we offer a cost-effective way to improve your cybersecurity, connectivity, and collaboration.

Leading technology paired with IT talent at your fingertips 24/7. With TPx, you're in great company. With technology from market leaders like Fortinet, Cisco, VMware and more — managed by TPx seasoned IT staff — you get the best of both worlds. Augment your IT team instantly without worrying about talent shortages and skill gaps.

Under pressure to cut costs? Outsourcing your IT needs is often quite a bit cheaper than handling cybersecurity in-house. With fixed price monthly recurring charges, you get better budget control and visibility.

Broad portfolio to help you do it all. Whether you need help safeguarding and backing up your data, preparing for compliance with a penetration scan or security assessments, monitoring your IT environment, managing system patches, or improving your staff's collaboration or connectivity…we can do it all!

In 2021, the finance sector experienced **the most cyber attacks** for the fourth year in a row, with the second highest average total cost of a data breach: $5.72M. (Source: IBM)

Meeting the challenge

IT Challenge	Why is it an issue?	How we help	Our Solutions
Cybersecurity	High volumes of sensitive data Facing persistent cyber threats Frequent targets of ransomware attacks Rising cloud adoption A rapid change in how business and work are conducted Increasing number of regulations to meet	Discover your weak points with network and cyber threat assessments Educate your staff on proper cybersecurity hygiene Detect and mitigate cyber threats Provide oversight and help 24/7/365 Keep your data and systems backed up and secure PCI-DSS compliant solutions and services to help you become defensible for the FTC Safeguards Rule	Security Advisory Services Managed Detection & Response (MDR) Managed Endpoints Managed Backups & Disaster Recovery Managed Inbox Detection & Response (IDR) Managed Firewalls Cybersecurity Awareness Training
Connectivity	Greater reliance on the cloud, which causes more issues with security and connectivity A rise in remote and hybrid office environments warrants the need for greater connectivity Digitization comes with increased Internet traffic, causing issues with bandwidth capacity Greater security and compliance responsibilities	Simplifying how businesses provision and manage networks across several locations Significant cost savings Better network visibility, security and control Reliable Internet access, even in remote areas Fast networks that are easy to scale and manage Ability to segment business and private web traffic 24/7 monitoring and alerting	Managed SD-WAN Managed Networks (Firewalls/WAN, LAN, switches) Business Internet
		Did you know? The average expected savings in spend per location from moving to SD-WAN is ~25% according to Gartner.	
Collaboration	Adapting to a new way of working Being able to communicate effectively with customers	Communicate anywhere, anytime Enterprise-grade security and end-to-end encryption Video, phone calling, call center, messaging and meetings all delivered in a single application Unlimited online meetings	UCx with Webex UCx Calling for Microsoft Teams UCx SmartVoice SIP Trunks
Lack of resources	IT and cybersecurity talent is hard to find and hard to retain Funding is always hard to come by	TPx worries about hiring, training and retaining the right talent TPx can take on things that would be more expensive to do in-house We charge a monthly flat fee, making it easy for you to stay within budget You can't afford not to modernize your IT	Managed Services

Why us?

We solve the finance industry's biggest IT challenges — cybersecurity, collaboration and communication — under one umbrella

We offer PCI DSS compliant solutions

We have IT solutions, staff, and experience necessary to handle your IT effectively and within your budget

120+ certifications across 60+ categories such as CompTIA, Cisco, SilverPeak, Fortinet, AWS, SMC and more

Trusted by over 1,200 financial companies

We help modernize your IT and communications while minimizing your risk from cyber threats

With 18,000 customers across 49,000+ locations, TPx is big enough to get the job done while small enough to be agile

We know one size doesn't fit all. With different service levels, you can customize and mix 'n match solutions to best suit your needs
