Networks

Business Internet

**Collaboration**

UCx with Webex

UCx Calling for Microsoft Teams

UCx SmartVoice SIP Trunks

Trusted by 1,200 financial customers, TPx offers a cost-effective way to improve your cybersecurity, connectivity, and collaboration.

**Leading technology paired with IT talent at your fingertips 24/7.** With TPx, you're in great company. With technology from market leaders like Fortinet, Cisco, VMware and more — managed by our seasoned IT staff — you get the best of both worlds. Augment your IT team instantly without worrying about talent shortages and skill gaps.

**Under pressure to cut costs?** Outsourcing to TPx is often quite a bit cheaper than doing it in-house. TPx delivers technology solutions at fixed costs to improve IT budget control and visibility.

**A vendor you can trust** TPx helps protect and connect over 18,000 customers, including 1,200 finance organizations. We are big enough to get the job done yet small enough to be agile. Our solutions are powered by market-leading technology and our staff is continuously trained to maintain a high level of expertise.

In 2021, the finance sector experienced **the most cyber attacks** for the fourth year in a row, with the second highest average total cost of a data breach: $5.72M. (Source: IBM)

# Meeting the challenge

| IT Challenge | Why is it an issue? | How TPx helps | TPx Solutions |
|---|---|---|---|
| Cybersecurity | High volumes of sensitive data<br><br>Facing persistent cyber threats<br><br>Frequent targets of ransomware attacks<br><br>Rising cloud adoption<br><br>A rapid change in how business and work are conducted<br><br>Increasing number of regulations to meet | Discover your weak points with network and cyber threat assessments<br><br>Educate your staff on proper cybersecurity hygiene<br><br>Detect and mitigate cyber threats<br><br>Provide oversight and help 24/7/365<br><br>Keep your data and systems backed up and secure<br><br>TPx offers PCI-DSS compliant solutions and services to help you become defensible for the FTC Safeguards Rule | Security Advisory Services<br><br>Managed Detection & Response (MDR)<br><br>Managed Endpoints<br><br>Managed Backups & Disaster Recovery<br><br>Managed Inbox Detection & Response (IDR)<br><br>Managed Firewalls<br><br>Cybersecurity Awareness Training |
| Connectivity | Greater reliance on the cloud, which causes more issues with security and connectivity<br><br>A rise in remote and hybrid office environments warrants the need for greater connectivity<br><br>Digitization comes with increased Internet traffic, causing issues with bandwidth capacity<br><br>Greater security and compliance responsibilities | Simplifying how businesses provision and manage networks across several locations<br><br>Significant cost savings<br><br>Better network visibility, security and control<br><br>Reliable Internet access, even in remote areas<br><br>Fast networks that are easy to scale and manage<br><br>Ability to segment business and private web traffic<br><br>24/7 monitoring and alerting<br><br>**Did you know?** The average expected savings in spend per location from moving to SD-WAN is ~25% according to Gartner. | Managed SD-WAN<br><br>Managed Networks (Firewalls/WAN, LAN, switches)<br><br>Business Internet |
| Collaboration | Adapting to a new way of working<br><br>Being able to communicate effectively with customers | Communicate anywhere, anytime<br><br>Enterprise-grade security and end-to-end encryption<br><br>Video, phone calling, call center, messaging and meetings all delivered in a single application<br><br>Unlimited online meetings | UCx with Webex<br><br>UCx Calling for Microsoft Teams<br><br>UCx SmartVoice SIP Trunks |
| Lack of resources | IT and cybersecurity talent is hard to find and hard to retain<br><br>Funding is always hard to come by | We worry about hiring, training and retaining the right talent<br><br>We can take on things that would be more expensive to do in-house<br><br>We charge a monthly flat fee, making it easy for you to stay within budget<br><br>You can't afford <u>not</u> to modernize your IT | Managed Services |

# Why TPx?

We solve the biggest finance IT challenges — cybersecurity, collaboration and communication — under one umbrella

**PCI DSS CERTIFIED**

We offer PCI DSS compliant solutions

We have IT solutions, staff, and experience necessary to do it effectively and within your budget

120+ certifications across 60+ categories such as CompTIA, Cisco, SilverPeak, Fortinet, AWS, SMC and more

Trusted by our 1200+ finance customers

We help modernize your IT and communications while minimizing your risk from cyber threats

With 18,000 customers across 49,000+ locations, we're big enough to get the job done while small enough to be agile

You can customize — different service levels, mix 'n match solutions — to best suit your needs; we know one size doesn't fit all

Want to learn more? Ask your TPx account manager for more information or call 888-407-9594.
