

Complimentary Evaluations and Training Options

	Description		Ideal Fit	Questions to Consider
Free Ransomware Evaluation	Free 30-minute session with TPx's security SME, after which a customer receives a 1-2 page high level output that denotes which areas of their security program are in need of attention. Not to be confused with paid ransomware assessment, which is much more in depth.	Free, 30-minute high-level review of customer's ability to recover from a ransomware attack	Any company is a good fit, since ransomware is an issue for all companies, but especially those that handle sensitive data (healthcare, education, finance, retail, etc.)	<ul style="list-style-type: none"> What is your company's plan if hit with ransomware? What controls do you have in place to prevent a ransomware attack?
Free Network Security Evaluation (formerly known as CTAP)	7 to 10-day assessment where an SME puts CTAP device on customer's network; then discusses an end report with them on their network's security, utilization, and productivity. Not to be confused with network security assessment, which TPx offers as part of Security Advisory Services.	A fast and free assessment to help customers identify their security risks and help them understand network usage, productivity and performance	<ul style="list-style-type: none"> All verticals and companies of all sizes Any company that has a firewall that is not managed by TPx CISO; IT manager/ leader/director; business owner; network engineer 	<ul style="list-style-type: none"> Would you like to better understand what's going on on your network, at no cost to you? When is the last time you ran a report on your network's biggest security risks and performance? Do you know what apps and sites are taking up most of your bandwidth and staff's productivity?
Free Cyber Security Hygiene "Townhall"	Companies get their staff educated on best cyber hygiene practices and common scams with our 30-minute virtual session led by TPx's security overlay	Educate your staff on best cyber hygiene practices and common scams with a free 30-minute virtual session with TPx's security SME	Smaller businesses that do not have specialized security staff on the team	<ul style="list-style-type: none"> How do you currently educate your staff on cybersecurity? Do you have a cybersecurity expert on your IT team?
Free Security Awareness Training: Phishing Course	Customers who want to see how TPx's security awareness training works can enroll up to 5 people from their company for a free virtual phishing course	Test out TPx's cybersecurity awareness training program with a free phishing course for up to 5 employees	Any company that does not have a security awareness training program	<ul style="list-style-type: none"> Do you have a formal cybersecurity training program? If yes, how does it work? Is it ongoing or a one-off? How are you training your staff on cybersecurity?
