

# Construction

## A Prime Target for Cybercrime

The construction sector experiences an average of 226 cyber incidents annually, the highest among industries, followed closely by transportation.\*

The most common threats include ransomware, credential exposure, and the exploitation of remote services like VPNs and RDP.

We chose TPx and we could not be happier with the solution, performance, and support."

# Key Cyber Threats and TPx Solutions

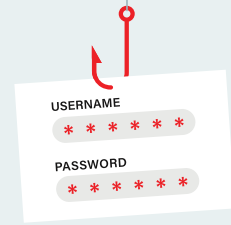

## Ransomware and Cyber Threats

Ransomware remains the biggest risk facing businesses in 2023, with LockBit being the most active ransomware group. Ransomware is a type of malicious software designed to block access to a computer system or data, often by encrypting it, until a sum of money is paid as ransom. TPx offers a free ransomware evaluation and a more in-depth ransomware assessment to help you discover your weaknesses. We also provide endpoint security and management to mitigate your vulnerabilities and data backup solutions to help you recover your data swiftly if a ransomware strikes.

## Remote Service Exploitation

Criminals frequently exploit VPNs and RDP to gain unauthorized access. TPx offers robust cybersecurity measures, including endpoint security and management, network segmentation, and managed detection and response to help you address this threat.

## Credential Exposure

The most common risk alert type is credential exposure. Credential exposure occurs when usernames, passwords, or other authentication details are accidentally revealed or stolen, making them accessible to unauthorized individuals or cybercriminals. TPx provides various cybersecurity services to help, including cybersecurity awareness training with phishing simulations, and Dark Web monitoring.

# TPx: Your Cyber Resilience Partner

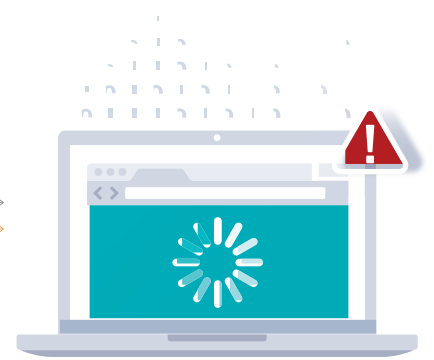

## Expertise in Construction IT Needs

TPx understands the unique cybersecurity challenges in construction, offering tailored solutions to enhance data protection and project efficiency.

## Comprehensive Cybersecurity and IT Management

TPx provides end-to-end IT services to keep construction operations secure and compliant.

## Proactive Threat Monitoring

Leveraging advanced technologies, TPx offers 24/7 monitoring to identify and respond to threats before they impact your business.

**Build your cybersecurity success with the help of an experienced provider, TPx.**
