

# Enhance Your Legal Practice with Expert IT Managed Services

Leave your cybersecurity and compliance worries to TPx and get peace of mind

## Why?

In today's digital age, legal organizations of all sizes face a dual challenge: cyber threats are on the rise and so are compliance requirements. Given limited budgets, it's a big burden. While cyber insurance offers some relief, it's not a silver bullet. The insurance alone won't prevent attacks nor shield your firm's reputation. Plus, you need robust protection measures to gain and maintain coverage.

## Benefits

- **Enhanced Cybersecurity:** Protect sensitive legal data from advanced cyber threats.
- **Compliance Support:** Reduce the risk of costly fines and legal issues. TPx can help you with HIPAA, PCI DSS and other regulatory standards.
- **Cost Efficiency:** Decrease operational costs associated with maintaining an in-house IT team, including hiring and training.
- **Proven Legal Expertise:** Benefit from TPx's extensive experience serving hundreds of legal organizations, ensuring tailored, industry-specific IT solutions.
- **Strengthened Client Trust:** Enhance client confidence with bolstered cybersecurity.
- **Scalable Services:** Receive customized support that evolves seamlessly with your growth.
- **End-to-End Managed IT Solution Stack:** Simplify your IT operations with TPx, offering a full suite of managed security, networking and communications.

## Why TPx?

TPx helps hundreds of legal customers with compliance and cybersecurity, freeing up your team's time for strategic tasks. We offer HIPAA, PCI DSS and SOC 2-compliant solutions and have a security advisory team helping legal organizations with various compliance needs through a service like Virtual Compliance Officer (VCO). With TPx's comprehensive, end-to-end IT solutions, legal organizations can streamline their operations by accessing all essential IT services from a single provider, significantly reducing complexity and minimizing cybersecurity risks.

More than a quarter of law firms (27%) suffered a security breach in 2022, up from 25% in 2021.

*The American Bar Association's Annual Cybersecurity Report*

Not only was TPx competitive on cost, but also flexible in customizing solutions that took into account the business climate. The willingness to partner and be flexible spoke volumes that we had made the right decision." *Scott Purcell, CEO, ACA International*

# KEY MANAGED IT SERVICES FOR LEGAL ORGANIZATIONS

CYBERSECURITY & COMPLIANCE | COLLABORATION | NETWORKING & CONNECTIVITY

## Virtual Compliance Officer (VCO)

VCO services offer specialized support to help ensure your business adheres to legal standards, safeguards against penalties and bolsters your reputation.

## Inbox Detection & Response (IDR)

TPx's Managed IDR service allows users to easily report suspicious emails with an Outlook plug-in to determine if the emails are safe or malicious quickly.

## Managed Detection & Response (MDR)

TPx's MDR helps your legal firm identify more threats, reduce attack dwell time and proactively mitigate attacks on your firewalls and endpoints.

## Managed SD-WAN

This delivers guaranteed connectivity performance, simplifies the management of network connections between disparate sites and improves mission-critical app performance.

## Network Vulnerability & Penetration Scanning

TPx's vulnerability and penetration scanning services evaluate your devices for open weaknesses on your network and show the impact of an attack.

## Endpoint Management & Security

TPx's endpoint security services leverage remote monitoring and management (RMM) and patch management to keep your servers and workstations secure and optimized.

## Unified Communications

UCx with Webex offers legal firms a secure, versatile communication platform, enhancing collaboration and productivity while ensuring client confidentiality and compliance.

## Managed Firewall

TPx cybersecurity experts will configure, deploy, manage and monitor your next-generation firewalls to block any unsolicited traffic from your network.

## Security Awareness Training

TPx's security awareness training (SAT) offering includes monthly phishing simulations and courses with automated reporting to track results.

## Managed Backups

With ransomware continuing to threaten law offices, TPx's managed backup can help you restore your system to a point before data is held hostage.

## Managed Microsoft 365

TPx provides a turnkey implementation and is backed by our experienced Microsoft Certified Solutions Experts (MCSEs) so you can ensure your application is working correctly.

## Business Internet

TPx offers your firm a wide array of internet access options, from dedicated internet access (DIA), broadband (cable and DSL), wireless 4G LTE, MPLS and more.

## CASE STUDIES

Lee, Hong, Degerman, Kang & Waimey

### Boosting Cybersecurity Without Objection

When a global law firm needed to ensure its cybersecurity tech stack set a precedent for future success, it turned to TPx.

Mason, Schilling & Mason

### Preparing for the FTC Safeguards Rule

New requirements were overwhelming for this small law firm, so TPx designed, implemented and managed an info security program for them to comply.

Los Angeles Dependency Lawyers

### Nonprofit Law Firm Needed Phone System With High-Quality Service

When a California-based legal services provider needed to ensure connectivity, TPx helped make IT easy.
