Elevate Your Construction Ops with Expert IT Managed Services

Immediately enhance your cybersecurity, networking, and collaboration

Why?

The construction industry grapples with significant IT challenges, including cybersecurity threats, data management complexities, outdated technology, and the integration of new technologies. These hurdles can compromise data security, hinder operational efficiency, and impede project success. TPx addresses these issues with robust cybersecurity measures to protect against digital threats, managed IT services to update and maintain critical software, and expert support for integrating new technologies. This comprehensive approach ensures construction companies can focus on their projects with the assurance that their IT infrastructure is secure, efficient, and future-ready.

Benefits

- **Enhanced Cybersecurity:** Safeguard sensitive data against cyberattacks, including ransomware, with TPx's comprehensive cybersecurity solutions.
- **Improved Compliance:** Get help navigating regulatory requirements and compliance standards, reducing legal and financial risks.
- **Efficient Collaboration:** Improve communication and collaboration among project teams, contractors, and clients, ensuring vital project information is accessible anywhere, anytime.
- **Optimized Networking Solutions:** Enhance your networks to ensure reliable and fast connectivity.
- **Access to the Latest Technologies and Expertise:** Access top-tier technology solutions and industry-best practices without hefty investments.
- **Reliable IT Support:** Receive continuous, customized support to minimize downtime, resolve issues promptly, and keep projects uninterrupted.
- **Cost Savings and Predictable IT Spending:** Reduce costs compared to in-house IT, with scalable services and predictable pricing.

Why TPx?

TPx offers a comprehensive suite of IT services tailored to the specific needs of the construction industry. By partnering with TPx, you can enhance your cybersecurity posture, improve operational efficiency, and embrace technological innovation, all while managing costs effectively and preparing for future growth. With TPx, you have more than just an MSP; you have a strategic partner committed to your success.

The construction sector (with an average of 226 incidents annually) is the most targeted by cyber criminals.

ReliaQuest Annual Cyber Threat Report

"We found the best company for us. TPx attends to all our needs and helps us meet the demands from our rapid expansion." *Elena Fernandez, Alliance Environmental Group*

KEY MANAGED IT SERVICES FOR CONSTRUCTION ORGS

CYBERSECURITY & COMPLIANCE | COLLABORATION | NETWORKING & CONNECTIVITY

Virtual Compliance Officer (VCO)

VCO services offer specialized support to help ensure your business adheres to industry standards, safeguards against penalties and bolsters your reputation.

Network Vulnerability & Penetration Scanning

TPx's vulnerability and penetration scanning services evaluate your devices for open weaknesses on your network and show the impact of an attack.

Security Awareness Training

TPx's security awareness training (SAT) offering includes monthly phishing simulations and courses with automated reporting to track results.

Inbox Detection & Response (IDR)

TPx's Managed IDR service allows users to easily report suspicious emails with an Outlook plug-in to determine if the emails are safe or malicious quickly.

Endpoint Management & Security

TPx's endpoint security services leverage remote monitoring and management (RMM) and patch management to keep your servers and workstations secure and optimized.

Managed Backups

With ransomware continuing to threaten construction companies, TPx's managed backup can help you restore your system to a point before data is held hostage.

Managed Detection & Response (MDR)

TPx's MDR helps your firm identify more threats, reduce attack dwell time and proactively mitigate attacks on your firewalls and endpoints.

Unified Communications

UCx with Webex offers companies a secure, versatile communication platform, enhancing collaboration and productivity while ensuring client confidentiality and compliance.

Managed Microsoft 365

TPx provides a turnkey implementation and is backed by our experienced Microsoft Certified Solutions Experts (MCSEs) so you can ensure your application is working correctly.

Managed SD-WAN

This delivers guaranteed connectivity performance, simplifies the management of network connections between disparate sites and improves mission-critical app performance.

Managed Firewall

TPx cybersecurity experts will configure, deploy, manage and monitor your next-generation firewalls to block any unsolicited traffic from your network.

Business Internet

TPx offers your firm a wide array of internet access options, from dedicated internet access (DIA), broadband (cable and DSL), wireless 4G LTE, MPLS and more.

CASE STUDIES

Alliance Environmental Group

Scaling Unified Communications to Support Customer Growth

With TPx, Alliance deployed a range of tools, from toll-free numbers to 4G backup to unified communications.

Atlantic Equipment

Deploying SD-WAN in Active-Active Mode, with 4G Failover in Key Locations

Atlantic enjoyed fully secure, encrypted connections to all of their locations using our SD-WAN solution while also gaining full visibility of their network.

Cumming Construction

Upgrading to the Latest SIP and MPLS Network Technologies

SmartVoice SIP with dynamic bandwidth allocation running on an MPLS IP VPN maximizes bandwidth ability to adapt to changing needs.
