

Managed Cybersecurity

Enhance your cybersecurity effortlessly and affordably

TPX

Every business, no matter the size or industry, needs to consider the impact of a cybersecurity breach – and be ready for it. If your customers' data got stolen, what would you do? When it comes to cybersecurity, an ounce of prevention is worth a pound of cure. While there is no silver bullet, it pays to be prepared. You can either go it “alone” or work with a managed services provider, like TPx, to help you prepare. Managing it in-house can be more expensive and painful since cybersecurity talent is scarce.

Unlike many smaller MSPs, TPx boasts a comprehensive IT and cybersecurity suite. In our offerings, we combine cutting-edge technology from industry leaders like Fortinet, Kaseya, and GoSecure with deep-seated expertise. We offer security advisory services, assessments, ransomware protection, user and endpoint security, firewalls, backups, managed detection and response and more. As a leading national provider serving thousands of customers, TPx has delivered expert IT and security solutions for over 25 years. We provide a range of service levels to meet your specific needs, whether you require minimal assistance or extensive support. Consider us an integral part of your team, available 24/7/365.

TPx Security Solutions

Cloud-to-Cloud Backup	One-click restore for Microsoft 365 (Exchange, OneDrive, SharePoint, Groups, & Teams)
Dark Web Monitoring	The detection and alerting of your company's sensitive data being shared on the hidden parts of the Internet, known as the Dark Web.
DNS Protection	Device security measures to safeguard devices that access the Internet by blocking known malicious threats.
Endpoint Management & Security	Endpoint protection that includes patch management, next-gen antivirus, RMM, MDR and more
Firewall	Next-gen firewall with UTM (unified threat management), VPN, MDR
Hybrid Backup	On-premises Datto backup with replication to secure cloud
Inbox Detection & Response	Microsoft 365 plug-in to enable users to validate emails' authenticity with one click
Incident Response Plan	Creation of a plan that outlines how your organization would respond to and manage cybersecurity incidents
Network Security Assessment	An assessment of your organization's network security posture and profile
Penetration Scan	Scan that shows how exploiting a vulnerability could result in a significant impact on the environment
Ransomware Assessment	In-depth review of company's readiness in responding to a ransomware attack
Security Awareness Training	Regular training courses with phishing simulations, following NIST guidelines
Virtual Compliance Officer (VCO)	Your security and compliance expert to assess and guide your compliance; Includes a Gap Assessment
Vulnerability Scan	A scan of devices connected to the network to identify vulnerabilities present due to open ports, missing patches, etc.
Wireless Security Assessment	An assessment of your org's wireless infrastructure and configuration, security posture, and functional capabilities

No-Cost Starter Options

Solution	Description
Dark Web Evaluation	Free one-time scan of the Dark Web to see if your company's sensitive data appear on the Dark Web
Network Security Evaluation (also known as CTAP)	Fast and free assessment to identify security risks and network usage
Ransomware Evaluation	Free 30-minute session with our security SME, with a high level output of areas in need of an attention
Security Awareness Townhall	Free 30-minute virtual session to educate staff on best cyber hygiene practices

"We get what we pay for and more with TPx's comprehensive cybersecurity expertise. We consider them a long-term partner."

Grower's Secret*

Combatting Common Myths

Cybersecurity Is Essential for Businesses of All Sizes

If you think your company is too small to be targeted, think again. Nearly half (43%) of all cyberattacks are against smaller organizations.

Cybersecurity Is Not Just Technology

Successful cybersecurity protection is a three-pronged approach that leverages people, processes and technology.

Cybersecurity Is an Investment, Not a Cost

75% of SMBs would not survive a ransomware attack.* Effective cybersecurity is a business investment because it supports continuous operations and boosts customer trust.

Cybersecurity Is Affordable for SMBs

Managed security (a.k.a. security-as-a-service) enables SMBs to source cybersecurity delivered by experts as an affordable monthly subscription.

Cybersecurity Services Aren't Created Equally

Choose a provider with both breadth and depth in security expertise and technologies to deliver the service levels you require.

Why TPx?

Comprehensive portfolio of managed IT services

Solutions for cybersecurity, connectivity, and collaboration.

150+ certs across 60+ competencies: CompTIA, Cisco, SMC, Fortinet, Microsoft

HIPAA, PCI-DSS, and SOC 2 compliant solutions

24
