

55% Savings on Advanced Endpoint Management and Protection

Less time chasing device issues.
More confidence when threats hit.

Your team already has enough to manage. Devices need monitoring. Applications need patching. Alerts come in after hours. And when something looks suspicious, someone has to figure out what happened fast.

The **Advanced Endpoint Bundle** brings endpoint monitoring and patching together with 24/7 endpoint threat monitoring and response to help reduce manual work, improve visibility, and support faster action.

For a limited time, customers can save
55% on both services when bundled:

Endpoint Management (Advanced)

Device monitoring and patching to help maintain endpoint health, performance, day-to-day manageability, and operational readiness.

Managed Endpoint Security (Advanced)

SentinelOne-powered protection with 24/7 MDR monitoring, analyst-led investigation, threat triage, proactive threat hunting, and coordinated response.

What this means for your business:

Reduce Risk, improve endpoint visibility, and help your team do more with less with our introductory offer

Includes: Endpoint Management Advanced + Managed Endpoint Security Advanced

Term: 36-month commitment required

Valid: Offer valid for new and existing customers that execute a service agreement with TPx between August 3, 2026 and November 3, 2026.
