Managed Cybersecurity

Enhance your cybersecurity effortlessly and affordably

What is It and Why Do You Need It?

Every business, no matter the size or industry, needs to consider the impact of a cybersecurity breach – and be ready for it. If your customers' data got stolen, what would you do? When it comes to cybersecurity, an ounce of prevention is worth a pound of cure. While there is no silver bullet, it pays to be prepared. You can either go it "alone" or work with a managed services provider, like TPx, to help you prepare. Managing it in-house can be more expensive and painful since cybersecurity talent is scarce.

Unlike many smaller MSPs, TPx boasts a comprehensive IT and cybersecurity suite. In our offerings, we combine cutting-edge technology from industry leaders like SentinelOne, Fortinet, and Zscaler with deep-seated expertise. We offer security advisory services, assessments, ransomware protection, user and endpoint security, firewalls, backups, and more. As a leading national provider serving thousands of customers, TPx has delivered expert IT and security solutions for over 25 years. We provide a range of service levels to meet your specific needs, whether you require minimal assistance or extensive support. Consider us an integral part of your team, available 24/7/365.

TPx Security Solutions

ASV Scan	An automated vulnerability assessment service that identifies and validates security weaknesses in external-facing systems to help organizations meet PCI compliance requirements.
Cloud-to-Cloud Backup	One-click restore for Microsoft 365 (Exchange, OneDrive, SharePoint, Groups, & Teams).
Cybersecurity Compliance Management	Your security and compliance expert to assess and guide your compliance; includes a Gap Assessment.
Dark Web Monitoring	The detection and alerting of your company's sensitive data being shared on the hidden parts of the Internet, known as the Dark Web.
Endpoint Management	Device management that supports endpoint health, patching, monitoring, and ongoing maintenance.
Endpoint Security	SentinelOne-powered threat detection and response with TPx-managed service support.
Firewall	Next-gen firewall with UTM (unified threat management), includes VPN.
Compliance Gap Assessment	A point-in-time evaluation of your security maturity against selected industry standards.
Hybrid Backup	On-premises Datto backup with replication to secure cloud.
Inbox Detection & Response	Microsoft 365 plug-in to enable users to validate emails' authenticity with one click.
IT Policy-as-a-service (ITPaaS)	Policy development that helps organizations create incident response, disaster recovery, and security documentation aligned with common regulatory and cybersecurity frameworks.
Microsoft 365 Security Assessment	An evaluation of your M365 environment to identify misconfigurations, security gaps, and opportunities to strengthen protection against cyber threats.
Network Security Assessment	An assessment of your organization's network security posture and profile
Penetration Scan	Scan that shows how exploiting a vulnerability could result in a significant impact on the environment
Security Awareness Training	Regular training courses with phishing simulations, following NIST guidelines

No-Cost Starter Options

Cybersecurity Readiness Evaluation	Free 30-minute session with our security SME, with a high-level output of areas in need of an attention
Dark Web Evaluation	Free one-time scan of the Dark Web to see if your company's sensitive data appears on the Dark Web
Network Security Evaluation (also known as CTAP)	Fast and free assessment to identify security risks and network usage

"We get what we pay for and more with TPx's comprehensive cybersecurity expertise. We consider them a long-term partner."

Jaz Jackson, Grower's Secret

Combating Common Myths

Cybersecurity Is Essential for Businesses of All Sizes

SMBs are common targets because attackers often look for organizations with limited security resources.

Cybersecurity Is Not Just Technology

Successful cybersecurity protection is a threepronged approach that leverages people, processes and technology.

Cybersecurity Is an Investment, Not a Cost

Effective cybersecurity is a business investment because it supports continuous operations and boosts customer trust.

Cybersecurity Is Affordable for SMBs

Managed security (a.k.a. security-asa-service) enables SMBs to source cybersecurity delivered by experts as an affordable monthly subscription.

Cybersecurity Services Aren't Created Equally

Choose a provider with both breadth and depth in security expertise and technologies to deliver the service levels you require.

Why TPx?

Comprehensive portfolio of managed IT services

Solutions for cybersecurity, connectivity, and collaboration.

Certs across many competencies: Cisco, SMC, Fortinet, Microsoft

HIPAA, PCI-DSS, and SOC 2 compliant solutions

Enterprise-class, anytime support

Tailored service levels and highlycustomizable solutions

National footprint, with multi-site, multi-carrier, partner coverage

25 years of helping customers with IT

Dedicated teams to ensure service excellence

Ongoing investment in automation, selfservice innovation, and back-office

Overview of TPx Cybersecurity Solutions

Don't wait until it's too late. Protect your business from the growing threats of ransomware and phishing attacks with our comprehensive cybersecurity solutions.
