SSL and IPsec VPN
- Advanced Persistent Threat (APT) Components**  
FortiSandbox detection and quarantine features
- Additional Security Features**

Back Next Cancel

5 Choose an installation directory and select **Next**.

6 Click **Install** and then **Finish**.

After FortiClient has been installed, you will see a new icon appear in the System Tray. **Double click** to open.

## Configuring a VPN Connection

1 Click on **Remote Access** and select **Configure VPN**.

Please connect to Endpoint Management Server (EMS) for license activation.  
**Unlicensed VPN access is available until Jul 08, 2019 5:29:23 PM**

[Configure VPN](#)

2 Fill out the **New VPN Connection** fields as shown in the example below and **Save**.

### New VPN Connection

VPN SSL-VPN IPsec VPN

Connection Name Enter any connection name

Description Enter any description

Remote Gateway <FortiGate WAN IP> (Obtain from firewall engineer) ✕  
+Add Remote Gateway

Customize port 10443

Client Certificate None ▼

Authentication  Prompt on login  Save login

Do not Warn Invalid Server Certificate

Cancel
Save

3 You may now **enter your credentials** to login to the VPN.

VPN Name: Your VPN

Username: Username

Password: .....

Connect

4 You will be notified of a successful VPN connection. You now have a secure connection to the network.

5 When you are ready to disconnect, **double-click on the System Tray icon**. It will show you session information. Click the **Disconnect** button. You will be notified when you are disconnected.
